Curves

Electrical life

Standard 831940 and Dual-current 831948

- 250 V~ 5 A resistive > 10 000 cycles
- 30 V= 3 A resistive 50 000 cycles

Dual-current 831948

- 5 V= 1 mA resistive 1 000 000 cycles

* Models 831948 are designed to operate equally well on low-current (1 mA 4 V minimum recommended) or medium-current circuits (5 A maximum) circuits. However, a given product should only be used to switch one type of circuit during its working life.
